

Coronavirus/COVID-19 and Allied Health Plans

The biggest items in the news is the spread of the [Coronavirus, or COVID-19](#).

We've received a number of calls asking about coverage for testing.

All Allied health plans that cover basic lab & diagnostic testing, automatically include testing for COVID-19.

If you use your LabOne benefits (through Quest Diagnostics), **the cost of testing is free.**

If you are not using the LabOne benefit, the cost is still a covered benefit, subject to normal out-of-pocket costs.

The test must be ordered by a medical professional who is equipped to take the proper respiratory specimen from individuals meeting the Center for Disease Control (CDC) clinical and/or epidemiological criteria for COVID-19 testing.

To learn more about LabOne testing through Quest Diagnostics visit www.questdiagnostics.com/home/Covid-19.

Connect with a health provider

MeMD, Teladoc and MDLIVE are great virtual visit resources for Allied members suffering from seasonal colds, the flu or suspected case of COVID-19. Use this service by following the instructions on your ID card. If you have a plan with Member Connection and MeMD, you can connect via your [Member Connection](#) app on your smartphone or computer.
