

## Gig Workers. Freelancers. Self-Employed Clients.

With deep expertise in the short-term health insurance market, our partner Pivot Health delivers flexible solutions for clients who don't fit traditional employer or ACA plans such as gig workers, freelancers and the self-employed.

Many of these individuals are priced out of ACA coverage or forced into plans that don't align with their needs, often leaving them overpaying for benefits they'll never use or going without coverage altogether. Pivot Health addresses this gap with practical, customizable options designed around real-life situations and budgets.

Pivot Health short-term medical plans offer lower premiums, flexible coverage and immediate approvals, allowing clients to focus on the benefits that matter most. These plans are a strong fit for individuals between jobs, waiting for employer coverage, or managing inconsistent income.

By offering Pivot Health, you position yourself as a solutions-focused advisor, helping clients stay protected while managing costs.
